

Camm-Pakit™

The **Camm-Pakit™** is the most advanced technology available for packaging two-component and three-component pre-measured liquid systems. These easy-to-use packages are safe, convenient, reliable, and precise. Packages can be any mix ratio in sizes from 2 grams to 6 pounds. Camm-Pakits™ are used to package epoxy, urethane and silicone systems in a wide range of viscosities for both industrial and consumer use. The Camm-Pakit™ is manufactured with a newly developed tri-laminate barrier film which is highly resistant to most epoxy systems. A burstable membrane seal is installed across the package separating the part A from the part B, requiring deliberate pressure to burst the seal, allowing both components to mix.

Contract Packaging:

Contract packaging is available through our Dispense Pak™ division for a variety of one-and two-component liquid and paste systems.

Lead times on production orders are 2-3 weeks when standard stock size Camm-Pakits™ are used. Samples and prototype packages available at no charge. Samples available in 1-2 weeks.

Standard Stock Size Camm-Pakits™		
Outside Dimension	Ratio	Capacity
1.5" x 5"	1:1	2 - 4 grams
2" x 6"	1:1	5 - 6 grams
2.75" x 8"	1:1	10 - 20 grams
2.75" x 10"	1:1	20 - 30 grams
4.25" x 8"	1:1	30 - 50 grams
4" x 10"	1:1	50 - 70 grams

Applications

- ◆ Aerospace
- ◆ Hobby
- ◆ Automotive
- ◆ Industrial Assembly
- ◆ Construction
- ◆ Medical
- ◆ Electronics
- ◆ Military Field Repair
- ◆ Fiberglass Repair
- ◆ Pipe Repair
- ◆ Fiber Optic Repair
- ◆ Potting Compound
- ◆ Taxidermy
- ◆ Many Many More ...
